Data Analyst | Business Intelligence & Operations Analytics

PROFESSIONAL SUMMARY

Data Analyst with 5+ years of experience mining large, multi-source operational and financial datasets, performing audits and reconciliation, defining KPIs, and building executive dashboards. Advanced SQL with Python, GCP/BigQuery, Looker, Power BI, Tableau, and spreadsheet reporting. Automated validation and reporting workflows reduced manual effort by 40%, improved accuracy by 25%, and supported decisions across 120+ business locations.

TECHNICAL SKILLS

Programming: SQL, Python (Pandas, NumPy), DAX

Visualization: Power BI, Tableau, Looker

Data & Cloud: GCP, BigQuery, Snowflake, SQL Server, PostgreSQL, MySQL, Azure Data Factory, Databricks, ETL

Audit & Analytics: Financial Auditing, Reconciliation, KPI Definition, Data Cleaning, Exception Analysis, Reporting Controls

Tools & AI: Google Sheets, Excel (Power Query, Pivot Tables, Advanced Formulas), dbt, Git, Jupyter, Codex, Claude, Gemini, NotebookLM, ChatGPT

PROFESSIONAL EXPERIENCE

MWI Eloquence - Data Analyst

Feb 2026 - Present | New York

- Built SQL reports and Power BI dashboards tracking sales, inventory, product trends, and store-level performance.
- Analyzed historical sales and stock data to identify top-performing locations and product categories and support pricing and inventory decisions.
- Managed dashboard refresh and distribution processes, performing pre-release reconciliation and quality checks for accurate, timely reporting.
- Translated business requirements into governed KPI definitions, recurring reports, and ad hoc operational analysis.
- Built an AI-assisted audit workflow using Python, Codex, and Claude to surface reconciliation exceptions and produce structured, human-reviewed summaries before reporting.

Technologies: SQL, Power BI, Excel

VERIZON - Data Analyst

Mar 2023 - Dec 2025 | New York

- Automated recurring reports with SQL, Python, and Azure Data Factory, reducing manual reporting effort by 40%.
- Built Power BI dashboards monitoring sales, inventory, chargebacks, employee performance, and operational KPIs across 120+ retail stores.
- Developed optimized SQL queries in BigQuery and Snowflake to analyze millions of transaction records.
- Improved reporting accuracy by 25% through automated Python-based data validation and reconciliation.
- Partnered with finance, operations, and business stakeholders to define metric logic and deliver recurring and ad hoc analysis.
- Used AI-assisted SQL and Python workflows to document validation logic and troubleshoot data-quality issues across multi-source reporting datasets.

Technologies: SQL, GCP/BigQuery, Snowflake, Azure Data Factory, Python, Power BI, DAX, Excel

CONVERGENCE - Data Analyst

Aug 2021 - Dec 2022 | Connecticut

- Reduced reporting cycle time by 20% using reusable SQL templates and Tableau workflows for financial and operational analysis.
- Performed financial and operational audits by reconciling MySQL and Excel data, improving audit accuracy by 15% through repeatable validation procedures.
- Documented reporting workflows, metric checks, and audit controls for cross-functional teams.

Technologies: SQL, Tableau, MySQL, Python, Excel

Flux Auto - Junior Data Scientist

Sep 2019 - Apr 2020 | India

- Reduced dataset rework by 30% through automated Python preprocessing, quality validation, and systematic monitoring.
- Analyzed large structured and unstructured automotive datasets with SQL and Python and partnered with engineers to improve ML data readiness.

Technologies: Python, SQL, Pandas, Jupyter Notebook

EDUCATION & CERTIFICATIONS

Master of Science in Data Science - Harrisburg University of Science and Technology | GPA: 3.76

Bachelor of Engineering in Computer Science - St. Xavier's Catholic College of Engineering

Certifications: Google Advanced Data Analytics Certificate (Google/Coursera) | Deep Learning Specialization (Coursera)
